1.15	Eurex® Underlying Corporate Actions <sup>2</sup>	License fee	3,900.00

<sup>1</sup> The product "Turnover from stock exchange settlement" also known as "BOEGA-file" is generated using trading and settlement data sourced from Xontro, Xetra, Tradegate and related processing systems like CASCADE. It provides uncleaned raw data only. In example, this is due to the underlying market structure—particularly broker-chain mechanisms in Xontro and Buy/Sell-based counting in Xetra and Tradegate - certain turnover volumes are counted more than once. This behaviour is inherent to the methodology and may result in double or multiple counting in the displayed turnover figures. For users requiring instruction-level data with single counting, we recommend complementing this product with Cascade Turnover data for retail structured products. For access to Cascade Turnover data or additional clarification, please contact [referencedatasales@deutsche-boerse.com](mailto:referencedatasales@deutsche-boerse.com)

<sup>2</sup> The license fee for the product "Eurex® Underlying Corporate Actions" includes one Affiliate; a per-affiliate fee will apply for the second and third Affiliate, and a single flat fee is charged for four or more Affiliates

2	Monthly services		€/year
2.1	Trading floors	flat rate	4,800.00
2.2	International foreign prices from Refinitiv <sup>1</sup>	flat rate	4,320.00
