ESG Data from the International Institute of Green Finance, China (IIGF)

Understanding ESG activities of Chinese companies

- The IIGF is an independent non-profit think tank whose goal is to support the development of Green Finance in China.
- The institute has developed an ESG evaluation methodology for the Chinese context and established a domestically leading ESG database.
- The database products include ESG information about listed companies and bond issuer companies.
- The findings provide international investors with a better understanding of the ESG activities of Chinese companies and thus support them in their decision-making.

Benefits

- The offering reflects the characteristics of the different industries and business models, which distinguishes it from other international indicators
- The products cover a wide range and a long-time span and can actively support investors in their decision making.
- They incorporate negative behaviour and risk measurement to effectively identify potential ESG risks

ESG Database products – ESG scores and ratings

- Listed Companies (CSI 300 ESG Data, CSI 800 ESG Data, All Listed Companies ESG Data)
- Bond Issuer Companies ESG Data (all Chinese bond market issuers except government bonds, central bank notes, local government bonds and asset-backed securities)

 Delivery modes: CSI 300 and 800 ESG data twice per year, All Listed Companies once per year, Bond Issuer Companies once per year

Access and data scope

- The database products are available within the Deutsche Börse Data Shop at historical-datashop.deutsche-boerse.com
- The data can be obtained on a one-off basis or as a subscription
- The latest data is only available as part of the subscription, in the case of a one-off retrieval we will provide you with all the historical data including the penultimate update level
- For more information please contact us at data.services@deutsche-boerse.com
