## Part I MiFIR Information Products

Part I of the Price List stipulates the fee model applicable for Information Products subject to Commission Delegated Regulation (EU) 2025/1156 ("hereinafter referred to as DR"). This covers all Information Products deriving from European trading venues, which are in compliance with the definition of Market Data pursuant to Art. 1 (b) DR and which are licensed through this Agreement.

## A General Provisions MiFIR Information Products and Market Data Client Categories

For MiFIR Information Products fees apply for the following usage types:

a) Onward Dissemination, b) Display Data Usage and c) Non-Display Data Usage.

The Unit of Count for each type of data is described in the respective sections below.

The fees included in this Price List are to be paid by the Market Data Client.

A categorization of Market Data Clients is determined through the combination of the applicable Usage Types.

These combinations result in seven clearly identifiable, exhaustive and non-overlapping Market Data Client Categories. The Market Data Client Categories are defined for each Market Data Client separately for each operating trading venue providing Information Products.

Category	Description	Onward Dissemination	Display Data Usage	Non-Display Data Usage
1	Combined	Permitted	Permitted	Permitted
2	Internal Usage only	-	Permitted	Permitted
3	Redistributing + Non-Display	Permitted	-	Permitted
4	Redistributing + Display	Permitted	Permitted	-
5	Redistributing only	Permitted	-	-
6	Display only	-	Permitted	-
7	Non-Display only	-	-	Permitted

A description of the respective Information Products is available at [www.mds.deutsche-boerse.com](http://www.mds.deutsche-boerse.com).

## B Onward Dissemination MiFIR Information Products

### B.1 General Provisions Distribution License Fees

Distribution License Fees apply for the right of Onward Dissemination of Licensed Information. The Distribution License Fees for the category 'Real-time' includes the fees for the respective category 'Delayed'. Distribution License Fees apply once per Market Data Client per Information Product per month if not otherwise specified.

For Distribution License Fees the fee liability commences upon receiving the Information, at the latest on the start date specified by the Market Data Client in accordance with Section 4.1 of the General Terms and Conditions to the Market Data Dissemination Agreement. Distribution License Fees will be charged to the Market Data Client monthly in advance. Such Distribution License Fees are not refundable upon termination of the Market Data Dissemination Agreement during the current calendar month.

### B.2 Standard Distribution License Fees

#### Deutsche Börse Group Spot Markets

	Real-time €/Month	Delayed €/Month
Xetra® Core <sup>1)</sup>	3,642.00	1,820.00

4) Tradegate® BSX license includes the license for the respective category for Tradegate® BSX – Pre-Trade and Tradegate® BSX – Post-Trade. The Onward Dissemination is permitted within Open User Groups.

## C Display Data Usage MiFIR Information Products

Data Fees are charged for the distribution to or the Internal Usage of Display Data by (i) Professional Clients (general usage) and (ii) Non-Professional Clients.

Data Fees charged for Professional Clients are governed by Section C.1, Data Fees for Non-Professional Clients are governed by Section C.2.

Data Fees per Information Product are invoiced on the basis of the Units of Count (i) Access ID, (ii) Physical User ID or (iii) per Individual Price Quote (for Non-Professional Clients), provided that no lump sum has been chosen (see also Part III of the Price List regarding lump sums). In case the Access ID is chosen as Unit of Count, each access to Information is billable unless no exception applies in accordance with Section 14.10 a) of the General Terms and Conditions to the Market Data Dissemination Agreement.

If the Physical User ID is used as the Unit of Count, a User's total accesses to an Information Product in accordance with Section 14.10 b) of the General Terms and Conditions to the Market Data Dissemination Agreement can be reported on a consolidated basis. The fee payable by the Market Data Client in this case will be determined by the number of Users.

If a fee is determined by Individual Price Quote, the fee for the quote will be applied.

A selection can be made between the above-mentioned Units of Count. If Physical User ID is to be selected as the Unit of Count, the requirements of Section 14.10 b) of the General Terms and Conditions to the Market Data Dissemination Agreement must be met before making the choice. The use of Access ID is subject to the requirements of Section 14.10 a) of the General Terms and Conditions to the Market Data Dissemination Agreement.

The fee liability for Data Fees commences upon the Entitlement to the Information by the Market Data Client or its Subscribers or upon the feasibility to access the Information. The Market Data Client is charged Data Fees as soon as the Reporting is available in accordance with Section 14 of the General Terms and Conditions to the Market Data Dissemination Agreement.

## C.1 Data Fees Professional Clients MiFIR Information Products

from 50,000,001	0.0010

# D Non-Display Data Usage MiFIR Information Products

## D.1 General Provisions/ Unit-of-Count Non-Display Data License Fees

The Market Data Fees for the Non-Display Data Licenses depend on the number of Device Accesses which use Information for Non-Display Data Usage purposes according to the definition in Section 2 of the General Terms and Conditions to the Market Data Dissemination Agreement. This is subdivided in four price levels:

- Entry: 1–2 Device Accesses,
- Medium: 3–10 Device Accesses,
- Plus: 11–30 Device Accesses,
- Unlimited: if > 30 Device Accesses or the number of Device Accesses cannot be controlled or specified or only the unlimited price level is available.

Non-Display Data License Fees apply once per Market Data Client per licensed Information Product per month if not otherwise specified.

## D.2 Standard Non-Display Data License Fees

4) Tradegate® BSX license includes the license for the respective category for Tradegate® BSX – Pre-Trade and Tradegate® BSX – Post-Trade.

## Part II Global Information Products

Part II of the Price List contains the fee model applicable for all Information Products that are not covered in Part I, as they do not fall under the DR. This includes Information Products from global trading venues, index providers and other market data providers. For special provisions please refer to Part III.

## E General Provisions Global Information Products

The fee model applicable to Information Products distinguishes by (i) Usage Type, (ii) Client Category and (iii) Unit of Count.

The Usage Type specifies which license applies for Onward Dissemination, Display Data Usage, Non-Display Data Usage and/or CFD Data Usage and the respective fees that are payable. Client Categories cover the Market Data Client's and/or the Subscriber's intended purpose of use or the client type. The scope of usage is determined by Units of Count.

The fees included in the Price List are to be paid by the Market Data Client. Distribution License Fees, Data Fees, Non-Display Data License Fees and CFD Data License Fees are payable on a cumulative basis, if not stated otherwise in the Price List.

Information Products differ regarding their granularity levels. The three different groups of Information Products are described in the following table.

### Granularity

Premium/ Order by Order <sup>1)</sup>	<ul style="list-style-type: none"> <li>▪ Real-time Analytics</li> <li>▪ Information Products with the most granular order book data (Level 3)</li> <li>▪ Lowest latency</li> </ul>
Ultra <sup>1)</sup>	<ul style="list-style-type: none"> <li>▪ Advanced Information Products</li> <li>▪ Un-netted pre-trade <sup>2)</sup> and trade data</li> <li>▪ Available as Level 1 or Level 2 data</li> <li>▪ Very low latency</li> </ul>
Core/ Standard	<ul style="list-style-type: none"> <li>▪ Regular Information Products</li> <li>▪ Netted Pre-Trade <sup>2)</sup> and un-netted Post-Trade data</li> <li>▪ Available as Level 1 or Level 2 data</li> <li>▪ Low latency</li> </ul>

1) Information Products from European trading venues do not fulfill the pre- and post-trade transparency obligations of MiFIR stipulated by Commission Delegated Regulation (EU) 2017/587 ("RTS 1") and Commission Delegated Regulation (EU) 2017/583 ("RTS 2").

2) Netted Pre-Trade information provides bids and offers at specified time intervals; un-netted Pre-Trade information provides all bids and offers (up to the pre-defined order book depth) as soon as they occur.

A description of the respective Information Products is available at [www.mds.deutsche-boerse.com](http://www.mds.deutsche-boerse.com).

If Licensed Information is directly or indirectly procured via Deutsche Börse AG's CEF® Core Multicast Systems, the content of the Information Products may be limited.

# F Onward Dissemination Global Information Products

## F.1 General Provisions Distribution License Fees

Distribution License Fees apply for the right of Onward Dissemination of Licensed Information. The Distribution License Fees for the category 'Real-time' includes the fees for the respective category 'Delayed'. They apply once per Market Data Client per Information Product per month if not otherwise specified. A distinction is made between the Client Categories applicable to the Onward Dissemination within the meaning of Section E para. 1: Vendors, Sub-Vendors, Multi-Member-System/ Service Providers, Central Institutes of a Banking Group and Web Hosting Providers. For the two latter categories optional special provisions apply as stated in Part III of the Price List.

For Distribution License Fees the fee liability commences upon receiving the Information, at the latest on the start date specified by the Market Data Client in accordance with Section 4.1 of the General Terms and Conditions to the Market Data Dissemination Agreement. Distribution License Fees will be charged to the Market Data Client monthly in advance. Such Distribution License Fees are not refundable upon termination of the Market Data Dissemination Agreement during the current calendar month.

## F.2 Standard Distribution License Fees

### Deutsche Börse Group Spot Markets

	Real-time €/Month	Delayed €/Month
Xetra® Order by Order <sup>1)</sup>	4,955.00	4,955.00

5) EEX<sup>®</sup> Gas Derivatives Market Ultra (EMDI) license includes the license for EEX<sup>®</sup> Gas Derivatives Market (MDI, EMDS).

For transfer or disclosure of Exchange-EDP data by trading participants or by Multi-Member-System / Service Providers to trading participants of Frankfurter Wertpapierbörse, Eurex Deutschland or European Energy Exchange the General Terms and Conditions to the respective Connection Agreement or Provider Connection Agreement of Frankfurter Wertpapierbörse, Eurex Deutschland or European Energy Exchange apply.

## G Display Data Usage Global Information Products

Data Fees are charged for the following Display Data Usage Client Categories: (i) Professional Clients (general usage), (ii) Professional Clients News Services, (iii) Professional Clients TV Ticker, and (iv) Non-Professional Clients.

Data Fees charged for (i) Professional Clients are governed by Section G.1, Data Fees for (iv) Non-Professional Clients are governed by Section G.2. Regarding Fees charged for Client Categories (ii) and (iii) see Part III of the Price List.

Data Fees per Information Product are invoiced on the basis of the Units of Count (i) Access ID, (ii) Physical User ID or (iii) per Individual Price Quotes (for Non-Professional Clients), provided that no lump sum has been chosen. In case the Access ID is chosen as Unit of Count, each access to Information is billable unless no exception applies in accordance with Section 14.10 a) of the General Terms and Conditions to the Market Data Dissemination Agreement.

If the Physical User ID is used as the Unit of Count, a User's total accesses to an Information Product in accordance with Section 14.10 b) of the General Terms and Conditions to the Market Data Dissemination Agreement can be reported on a consolidated basis. The fee payable by the Market Data Client in this case will be determined by the number of Users. If a fee is determined by Individual Price Quote, the fee for the quote will be applied.

A choice can be made between the above-mentioned Units of Count. If Physical User ID is to be selected as the Unit of Count, the requirements of Section 14.10 b) of the General Terms and Conditions to the Market Data Dissemination Agreement must be met before making the choice. The use of Access ID is subject to the requirements of Section 14.10 a) of the General Terms and Conditions to the Market Data Dissemination Agreement.

The fee liability for Data Fees commences upon the Entitlement to the Information by the Market Data Client or its Subscribers or upon the feasibility to access the information. The Market Data Client is charged Data Fees as soon as the Reporting is available in accordance with Section 14 of the General Terms and Conditions to the Market Data Dissemination Agreement.

# G.1 Data Fees Professional Clients Global Information Products

## G.1.1 General Provisions Data Fees Professional Clients

from 50,000,001	0.0010

# H Non-Display Data Usage Global Information Products

## H.1 General Provisions Non-Display Data License Fees

The Non-Display Data License Fees are billed on the basis of the following Non-Display Client Categories, which are determined through the intended scope of use:

- (i) Trading as Principal,
- (ii) Brokerage,
- (iii) Trading Platform,
- (iv) Index Calculation and
- (v) Other Application Usage.

The term 'trading based activities' comprises of the Client Categories (i) to (iii). The term "other activities" comprises of the Client Categories (iv) and (v). The scope of usage covered within the Client Categories is described in detail below.

The Market Data Fees for the Non-Display Data Licenses applicable to trading based activities depend on the number of Device Accesses, which use Information for Non-Display Data Usage purposes according to the definition in Section 2 of the General Terms and Conditions to the Market Data Dissemination Agreement. This is subdivided in four price levels:

- Entry: 1–2 Device Accesses,
- Medium: 3–10 Device Accesses,
- Plus: 11–30 Device Accesses,
- Unlimited: if > 30 Device Accesses or the number of Device Accesses cannot be controlled or specified or only the unlimited price level is available.

Fees for trading based activities are determined by a tiered model:

- Tier 3 (lowest level): Trading as Principal or Brokerage
- Tier 2: Trading as Principal and Brokerage, and
- Tier 1 (highest level): Trading Platform

Each higher level includes the Usage of the lower levels. For each Tier the price levels depending on the number of Device Accesses used (Entry, Medium, Plus, Unlimited – see above) apply. Billing will be rendered based on the relevant Tier and price level whereas the total number of Device Accesses for each Client Category included shall be aggregated. Details are described below.

Fees for other activities are determined by the following Client Categories without differentiation regarding the number of Device Accesses used:

- Index Calculation, and
- Other Application Usage.

Alternatively to a billing based on different Client Categories, Tiers or number of Device Accesses, also a lump sum (Enterprise License) is available, which comprises all available Client Categories for one Information Product with unlimited scope of use regarding Device Accesses used (see Section H.3 Non-Display Enterprise License Fees).

Non-Display Data License Fees apply once per Market Data Client per licensed Information Product with the highest granularity level and per category (see above) per month if not otherwise specified and shall be remunerated cumulatively if not otherwise specified.

## H.1.1 Client Categories and Unit-of-Count Device Accesses

The following description provides further details of the Client Categories and respective counting of Device Accesses applicable for the Non-Display Data License Fees.

### **Trading based activities**

Examples of 'trading based activities' include semi-automated or automated order/quote generation, order pegging, price referencing for trading purposes, smart order routing to facilitate trading, order management, execution management, market making, 'black box' trading, algorithmic trading, program trading and the operation of trading platforms as well as quoting and trading of financial derivatives (including but not limited to futures, options, warrants and certificates linked to the respective underlying market data).

The following Client Categories are relevant for trading based activities:

#### (i) Trading as Principal

The Client Category Trading as Principal refers to proprietary trading activities (i.e. trading in own name and for own account; "Trading as Principal"). It includes algorithmic and/or automated and/or semi-automated order generation, automated execution management and/or automated quoting as part of market making and instrument pricing (e.g. as part of derivatives issuance and trading) for the purpose of trading in one's own name. Trading as Principal does not include the completion of trades on behalf of clients of the Market Data Client even if Market Data Client is using its own inventory. Such usage is included in Client Category "Brokerage". E.g. the Client Category Trading as Principal does not entitle Market Data Clients to grant third parties access for activating algorithmic orders and/or accessing APIs capable of receiving order messages from third parties. Non-Display License Fees are charged on a per Information Product basis according to the total number of Device Accesses which use the Information. Whenever one Device has the possibility to access Information simultaneously for the Client Category "Trading as Principal", each possible access shall be counted as a Device Access.

#### (ii) Brokerage

The Client Category Brokerage refers to brokerage activities and the facilitation of client trading activities (i.e. trading in another's name for the account of others or trading in own name for the account of others (brokerage business); "Brokerage"). It includes but is not limited to automated order generation and execution management for clients (e.g. smart order routing) as well as the provision of access for clients to functions augmenting the user's trading activities and/or algorithmic trading tools (e.g. generation of child orders based on parent orders). Non-Display License Fees are charged on a per Information Product basis according to the total number of Device Accesses which use Information. Whenever a Device has the possibility to access Information simultaneously for the Client Category "Trading as Brokerage", each possible access shall be counted as a Device Access. This includes every technical or manual access (including trade message access point) for clients who can activate algorithmic orders and/or access APIs capable of receiving order messages from third parties. Each of these accesses shall be counted separately as an additional Device Access.

### (iii) Trading Platform

The operation of a trading platform, i.e. organising a market (irrespective of whether buy-side and sell-side interests are brought together on a bilateral or multilateral basis), establishes a single Client Category ("Trading Platform"). In particular, this includes operating an exchange, a multilateral trading facility ("MTF"), an organized trading facility ("OTF") or comparable alternative trading system, performing systematic internalization ("SI") as well as the offering of so-called broker crossing networks, multi-dealer platforms or dark pools. For the avoidance of doubt, the operation of a Trading Platform according to third country provisions (e.g. based on the US Regulation NMS or Regulation ATS) is also subject to this provision. Non-Display License Fees are charged on a per Information Product basis according to the total number of Device Accesses which use Information. Whenever a Device has the possibility to access Information simultaneously for the Client Category "Trading Platform", each possible access shall be counted as a Device Access.

### Other activities

The following Client Categories are relevant for other activities:

#### (iv) Index Calculation

The Client Category Index Calculation refers to the Non-Display Data Usage for the purpose of administration including calculation and dissemination of an index / a benchmark or several indices / benchmarks ("Index Calculation"). This Non-Display Client Category addresses the administrator who has control over the provision of the index or benchmark. It does not address Non-Display Data Usage on behalf of a third party, such as the index calculation as a calculation agent with or without being the administrator for such an index or benchmark. In cases where an index or benchmark is being calculated on behalf of a third party that third party is subject to the licensing requirement.

Deutsche Börse AG determines whether an index or benchmark is calculated on behalf of a third party by taking into consideration the specific circumstances of the case, e.g., whether

- Some or all intellectual property rights of the index or benchmark belong to the third party, and/or
- The calculation agent is commissioned by a third party for the calculation of an index or benchmark, and/or
- The third party delivers the index methodology which needs to be applied by the calculation agent.

#### (v) Other Application Usage

When licensing this category, Client is entitled for Non-Display Data Usage for other purposes than trading based activities and/or Index Calculation. This includes, but is not limited to the following usages: risk management, profit and loss calculation, portfolio valuation, quantitative analysis, fund administration, fund accounting, portfolio management or instrument pricing. It does not include the execution of Non-Display Data Usage by the Market Data Client as a calculating agent on behalf of a third party. This means where derived data (e.g. iNAV's) are calculated on behalf of a third party and some or all of the intellectual property rights in the underlying product (e.g. an ETF) will vest in that third party, the third party is subject to a Non-Display Data Usage license for Other Application Usage.

## H.1.2 Tiered fee model for trading based activities

The following description provides further details of the tiered model that determines the Non-Display License Fees for trading based activities:

### **Tier 3 – Trading as Principal or Brokerage**

Tier 3 of the Non-Display Data License Fee applicable for trading based activities requires the selection of a license for either the Client Category

Trading as Principal, **or**  
Brokerage.

The license and the total number of Device Accesses refers only to the selected activity.

### **Tier 2 – Trading as Principal and Brokerage**

Tier 2 of the Non-Display Data License Fee applicable for trading based activities includes the license for the Client Categories

Trading as Principal, **and**  
Brokerage.

Thus, the total number of Device Accesses for each Client Category included shall be aggregated. Non-Display Data License Fees for Tier 3 do not apply if Non-Display Data License Fees for Tier 2 are paid.

### **Tier 1 – Trading Platform**

The category Tier 1 includes Non-Display Data Usage for the Client Categories

Trading Platform, **and**  
Trading as Principal, **and**  
Brokerage.

Additional Non-Display Data License Fees for Tier 2 and Tier 3 do not apply if Non-Display Data License Fees for Tier 1 are paid. The total number of Device Accesses for each of the Client Categories applicable shall be aggregated.

## H.2 Standard Non-Display Data License Fees

### Deutsche Börse Group Spot Markets

# I CFD Data Usage Global Information Products

## I.1 General Provisions CFD Data License Fees

CFD Data License Fees apply for CFD Data Usage and consist of a Basic License Fee, a White Labelling fee and of a Numbers of Users fee.

The Basic License Fee shall apply if the respective Information Product is used within a CFD Data Usage and includes the right to provide the calculated prices to less than 1000 Users.

A fee is payable on a cumulative basis in addition to the Basic License Fee if the calculated prices within a CFD Data Usage are provided to Users via White Labelling Partners. For this purpose, the following categories may be licensed:

- Tier 4 – License includes the right of provision to up to 5 White Labelling Partners.
- Tier 3 – License includes the right of provision to up to 10 White Labelling Partners.
- Tier 2 – License includes the right of provision to up to 15 White Labelling Partners.
- Tier 1 – License includes the right of provision to more than 15 White Labelling Partners.

A fee for the number of Users is payable on a cumulative basis in addition to the Basic License Fees if the calculated prices within a CFD Data Usage are provided to more than 1,000 Users. The following sliding scale applies:

- Tier 4 – License includes the right of provision to up to 2,000 Users.
- Tier 3 – License includes the right of provision to up to 5,000 Users.
- Tier 2 – License includes the right of provision to up to 10,000 Users.
- Tier 1 – License includes the right of provision to more than 10,000 Users.

The number of White Labelling Partners and the number of Users are Units of Count within the meaning of Section E para. 1. If Onward Dissemination to API Customers takes place in accordance with the table in Section I.2, in which above listed Units of Count cannot be determined, the fees in Section I.2 based on the Unit of Count API Customers apply.

The Unit of Count 'User' is defined as a person or entity who during the respective month at least at one time held a position in an instrument where the price is calculated based on Deutsche Börse AG Information. For the avoidance of doubt, an API Customer and/or White Labelling Partner is not considered a User. If a User has multiple accounts with the Market Data Client, the Market Data Client is allowed to net these accounts with regard to the CFD Data License Fees, if it can be demonstrated that the accounts belong to the same User. Such netting is not permitted if the above-mentioned requirements are not fulfilled. The number of Users has to be indicated when placing the order in MD+S interactive. The number of Users per month has to be demonstrated also for the past on request or in case of an Audit.

For CFD Data Usage of other Information Products than those specified in Section I.2, Deutsche Börse AG has to be contacted in advance. The terms applicable to CFD Data Usage are specified in Section VI of the General Terms and Conditions to the Market Data Dissemination Agreement.

## I.2 Standard CFD Data License Fees

### CFD Data Usage

			CFD Data License Fees €/Month			
			Tier 4	Tier 3	Tier 2	Tier 1
Number of White Labelling Partners			up to 5	up to 10	up to 15	more than 15
Number of Users			<2,000	<5,000	<10,000	≥10,000

	White Labelling Partners		614.00	1,168.00	1,659.00	2,090.00
	Users		173.00	667.00	1,310.00	1,879.00

CFD Data Usage, where the Market Data Client provides calculated prices to third party platforms without being able to determine the number of Users or White Label Partners of those third party platforms (which regularly will be the case when providing the calculated prices via an application programming interface (API) or data feed), is subject to:

- the conclusion of a Market Data Dissemination Agreement by the provider of the third party platform with DBAG and payment of the applicable CFD Data License Fees in accordance with the Price List; or
- the notification of DBAG by the Market Data Client of respective third party platforms which shall be provided with calculated prices as part of its CFD Data Usage. The Market Data Client has to remunerate the license fee for the relevant Information Products as specified in the table “API Customers – Scale Prices” for each third party platform. In addition, the Market Data Client falls automatically under Tier 1 with regard to the number of Users and has to pay the corresponding Tier 1 CFD Data License Fees regardless of the actual number of Users.

## API Customers – Scale Prices

Number of API Customers	CFD Data License Fees €/Month

4) EEX® Gas Derivatives Market Ultra license includes the license for the respective category for EEX® Gas Derivatives Market.

### I.3 Special Provisions CFD Data License Fees

#### Special Fees, Netting, Campaign

	<b>Description and Prices</b>	<b>Supplemental Provisions</b>
<b>Users for whom the Market Data Client already pays Data Fees</b>	If the Market Data Client already pays Data Fees for a particular User for the relevant Information Product, this User does not need to be taken into account for the CFD Data License Fees.	<p>The number of Users has to be taken into account for the order via the Online Order Form in MD+S interactive.</p> <p>The number of Users per month has to be demonstrated also for the past on request or in case of an Audit.</p>
<b>Non-Display Data Usage in connection with CFD Data Usage</b>	If the Market Data Client in relation with its CFD Data Usage is also subject to the Non-Display Data Usage license, e.g. for the internal risk management of its CFD business, this Non-Display Internal Usage is covered by the CFD Data License Fees.	<p>The Market Data Client has to inform Deutsche Börse AG of a respective Non-Display Data Usage in advance and has to obtain from Deutsche Börse AG the written approval that the internal Non-Display Data Usage is covered by the license for CFD Data Usage.</p> <p>The Market Data Client needs to demonstrate on request or during an Audit also for the past that the internal Non-Display Data Usage has solely taken place in connection with the CFD Data Usage.</p>
<b>Usage of more than one Information Product for the calculation of prices for one instrument</b>	Where the CFD Data Usage includes more than one Information Product for the price calculation of a single instrument, the Market Data Client shall only pay the CFD Data License Fees for the Information Product with the highest price according to the Price List.	The Market Data Client needs to inform Deutsche Börse AG about the CFD Data Usage with multiple Information Products in advance and needs to agree with Deutsche Börse AG the licensing process.
